	is connected with the shore by a concrete runway of about the
	same height and width. Mooring buoys are located about 200
	feet from each end of the wharf, to which the bow and stern lines of ships at the wharf are made fast.
Γ	25X
L	
	A single eight-inch fuel line extends along the runway to the wharf, and there is a double eight-inch connection to this line on the wharf.
	There is a small building located at the outer end of the runway
	in which the stevedores seek shelter and in which a telephone is located. There is no weight handling gear of any type on the wharf.
	Potable water is available at the wharf through a three-inch line.
	Delivery is at the rate of 20 to 25 tons per hour, and quality is
Γ	good.
Г	The fuel pier is lighted by electricity
L	
	At the shoreward end of the runway is a fenced enclosure in which
Г	are located perhaps 12 storage tanks. These tanks were "standard size, neither large nor small."
٢	
1	There were also some old buildings within the enclosure,
1	there are also one or more railroad
